### Brief Description of Institution

The Graduate University for Advanced Studies, SOKENDAI, is an independent graduate university (the first of its kind as a national university in Japan) founded in 1988 with the aim of contributing to the creation and development of culture through education and research in academic theory and application. As a world-leading international graduate university, SOKENDAI operates in close partnership and collaboration with affiliated inter-university research institutes.

The role of the inter-university research institutes and the world-class research environment they offer as centers of educational excellence is one of the most distinctive features of SOKENDAI.

The inter-university research institutes (parent institutes) provide researchers from universities across Japan with resources (e.g., large-scale facilities and equipment, large amount of data, and valuable materials, etc.) that are not available in ordinary universities, and play a leading role in advancing scientific research in Japan through joint research with researchers nationwide and abroad.

SOKENDAI employs a large group of researchers from various research fields as faculty members to provide advanced specialized education within the excellent research environment provided by such parent institutes.
