

(Three-year Doctoral course program)

Notes to applicants for the entrance examination

Department of Fusion Science
School of Physical Sciences

- The written examination and the interview for applicants will be conducted online using the ZOOM system and Microsoft Teams this year.
- Applicants need to prepare the environment required for the online examination.
- Required device: Personal computer; Head-set with microphone and headphone. Separate microphone and earphones are acceptable; A web camera connected with a USB cable to your personal computer (camera built into computer is not recommended); and smartphone for making contact in case of emergency and for taking a photo of answer sheets to send to us.
- An isolated room is required. The applicant's home is acceptable. If other persons are in the same room during the examination, we would judge it as applicant misconduct. The room is required to have a quiet environment as much as possible.
- If you will not able to prepared the environment required for the online examination, please contact to the Graduate Student Affairs Section shown below as soon as possible.
- We will have a connection test during early or mid August, 2022. Please prepare the same environment as for the examination.
- Details of the online examination will be informed individually.
- If some technical problems with the online examination occur during the examination, we might hold the examination again later.
- In case of suspicious behavior such as the existence of other persons in the same room during the examination, the application could be rejected.
- Please be informed that the online examination will be recorded only for the purpose of the examination.
- It is prohibited that the applicant records the examination using any device.
